Subject: Re: Region 3 access

Hi John -

Have a question for you ... Can any of the R3 folks get onto the FTP site for Dimock?

Marcos Aquino will be helping review the RAD data. I thought that the FTP site would be the best place to find most of the reports.

As of today, I believe that Forte Meade has posted all RAD data (with the exception of Thorium (1200002 Alpha Spec. - Thorium). SERAS folks are still working on uploading to Scribe database. With the exception of the Thorium - all the data should be in Scribe by the middle of next week. Once it is - we can generate some spreadsheets that would likely be helpful in reviewing the data.

The PDF narrative reports can be found on the FTP site. Go to Dimock folder - then EPA LAB will be in two folders: February 2012 and March 2012. Each of these folders contains the RAD data in the NAREL folders.

Thanks - Kelley
